In the name of God

Welcome to IUA 2022!

On behalf of Iranian Urological Association (IUA), We are very pleased to welcome you to the 25<sup>th</sup> Annual Congress of IUA which is being held at Tehran from 17 to 20 May 2022. As you know a scientific congress is the gathering of professional experts to provide an educational grounding based on evidence-based practices and experiences acquired through many years of hard work, study and research, entitled «Adult Learning Environment».

Adult Learning Environment has got its own specific approaches including needs assessment, education along with active participation and evaluation. In this respect, the 25<sup>th</sup> IUA congress has been designed to provide an innovative and comprehensive overview of the latest topics in urology and will be held in 4 days with attractive and interactive scientific sessions including lectures, panels, debates, symposium, parallel masterclasses, live surgeries, and presentations, relying on the knowledge and expertise of our colleagues in the country and our close and long-lasting relationship with the world's major urological associations & societies, namely EAU, SIU, UAA, ICS and INUS by designed scientific Joint sessions. After a challenging period, due to COVID - 19 outbreak, we look forward to bringing you the 25<sup>th</sup> Annual IUA Congress - one of the biggest and the most important urological event in-person, in Iran. The 25<sup>th</sup> IUA congress is where the most up-to-date research and notable development, and evidence-based practices are featured, and leaders convene to share their expertise. This congress is also the event to attend if you want to expand your professional network and meet with colleagues from around the country. we sincerely hope you enjoy the 25<sup>th</sup> IUA congress as an adult Learning event and also take home a great deal of scientific knowledge as a souvenir to improve your evidence based practice and help our patients altogether.

Warm Regards,

## Message of Scientific and Executive Committee Chairmen

For over four decades, the Iranian Urology Association has earned its reputation as the platform to feature the dynamic work of urologists within and beyond our borders.

Without breaking this tradition, the Scientific Program of the upcoming IUA2022 congress is going to deliver significant urological updates, tackle controversial issues and clinical dilemmas. For this cutting-edge gathering, the scientific committee has prepared a program that reflects the state of the art of urology and places the IUA congress as a regional reference among all urological meetings.

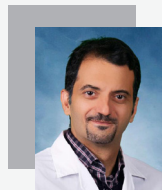

We have been very lucky to attract some of the most innovative international guest speakers focusing on key clinical topics in the fields of Uro-Oncology, Endourology, Pediatrics, Reconstructive Urology, Female Urology, Neuro- Urology, and Andrology. New relevant themed sessions such as practical organized masterclasses and five attractive live surgeries have been added to the scientific program. The new mission of the IUA will therefore be to serve as a platform for knowledge transfer, experience exchange, continuous learning, and capacity building in order to empower the next generation of urology leaders in Iran. We look forward to welcoming you all to this congress and hope you will still have plenty of opportunity to exchange knowledge and also build long-lasting memories during this event.

Sincerely

**Mehdi Kardoust Parizi**

Associate Professor and Chairman of Urology Department, Shariati Hospital, Tehran University of Medical Sciences

**Nima Narimani**

Associate Professor, Hasheminejad Hospital, Iran University of Medical Sciences
